AUTOMATIC
FINISHING LINE**

ALFA

FULLY AUTOMATIC FINISHING LINE

FULLY AUTOMATIC FINISHING OF BED SHEETS AND CURTAINS

Longitudinal sewing, dimensioning, cross cutting, edge trimming, labelling, cross hemming, sewing, stacking. The Magetron **ALFA** takes over the complete processing procedure with extraordinary performance, uncompromising quality and flexibility.

Since 1975 we have increasingly deepened, through a constant and accurate system of research and development, how to get high standards of quality in the cross cutting cross hemming process without compromising efficiency, productivity and flexibility.

ALFA, the latest generation of fully automatic finishing machine, combines all these features being based on the most advanced available technologies and innovative systems.

State of the art in achieving the greatest goal: customer's satisfaction.

EFFICIENCY AND PRODUCTIVITY

Extraordinary efficiency and manual operations reduced to a minimum allow to have high productivity, an attractive cost-performance ratio and profitability on a daily basis.

QUALITY

Innovative technology, optimal processing methods and superior standards of construction grant an incredibly high level of the final output.

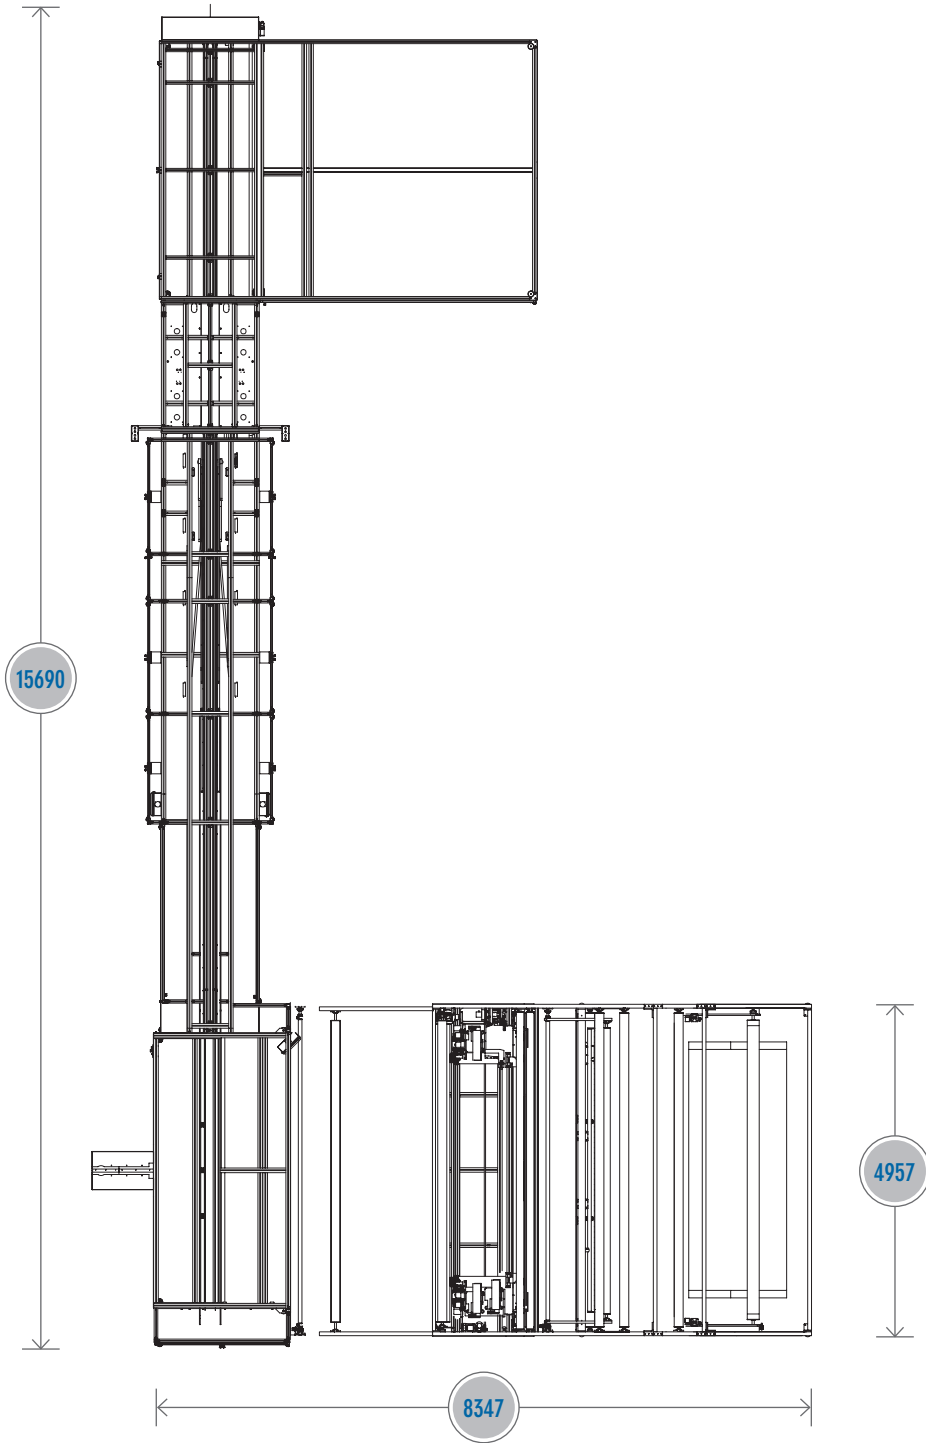

MODULAR CONCEPT

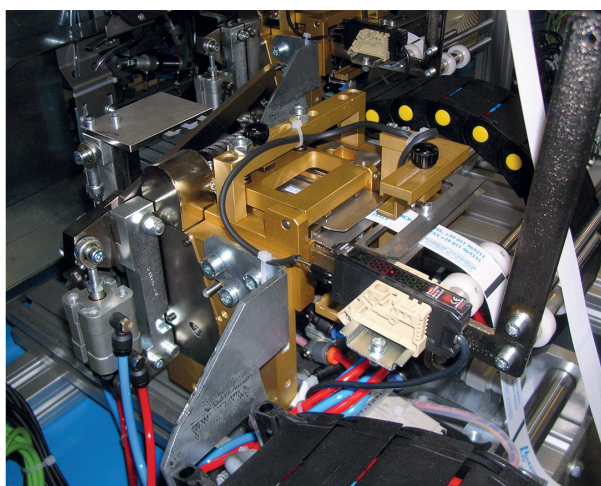

Longitudinal sewing and cross cutting cross hemming can be connected in one complete fully automatic line or used separately. The investment can be done in accordance with the requirement. Each module can complete a part of the process giving, in this way, total versatility and flexibility.

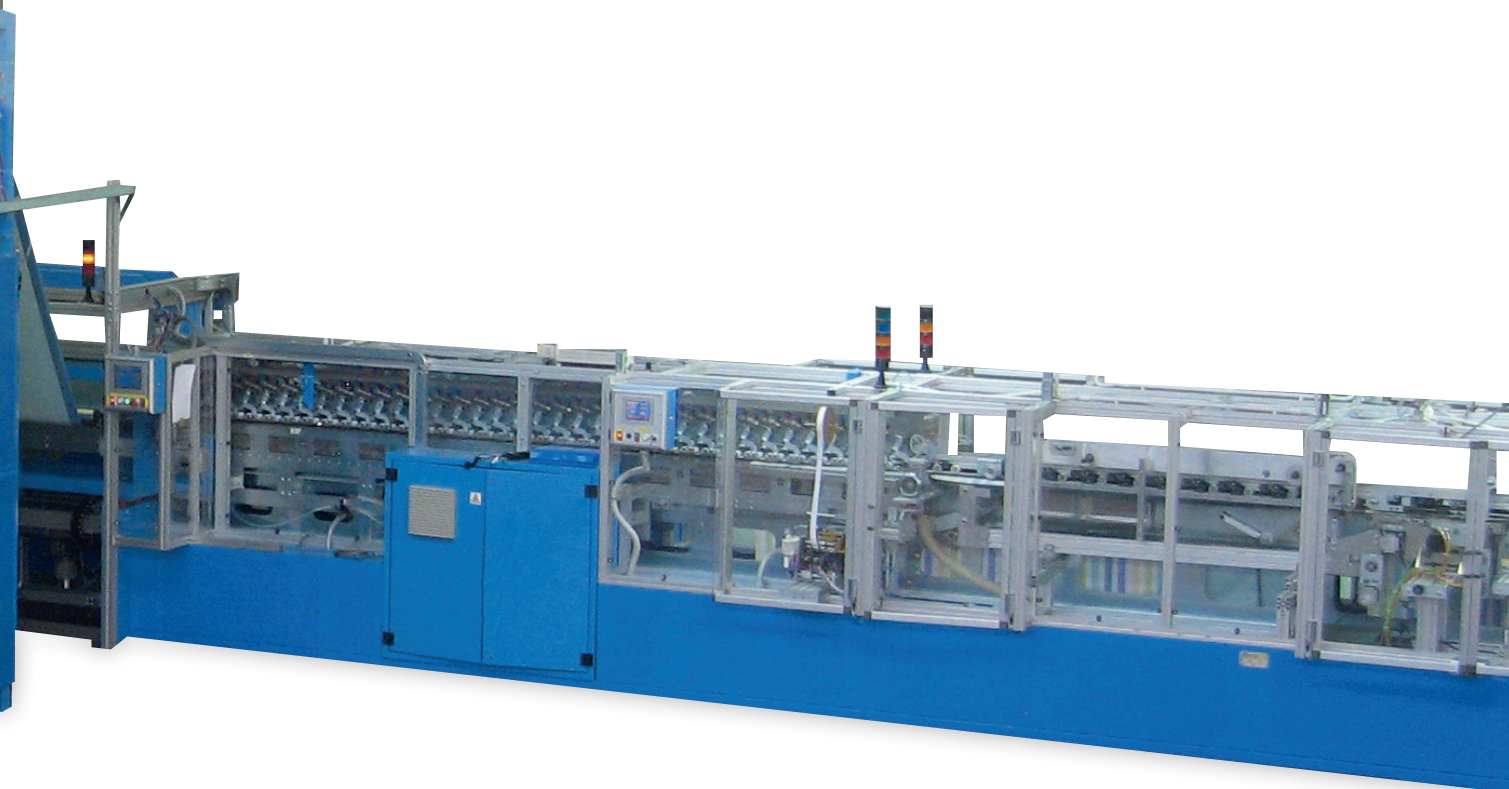

FLEXIBILITY BY DESIGN

Capable to process different kind of home textiles and uncountable options available in Magetron **ALFA** can grant high standards of flexibility and customization, key factor in the nowadays' success.

OVERALL
DIMENSIONS

ALFA

CUSTOMIZE AS PER YOUR REQUIREMENTS

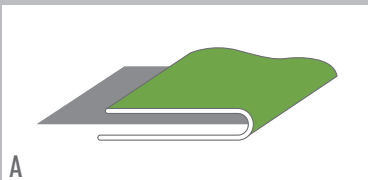

Production options

- WxL (width x length)
- LxL (length x length)

Bed covers
Bedspreads
Blankets

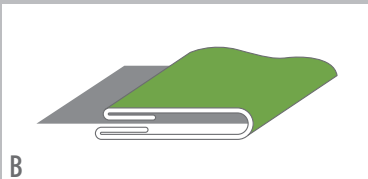

Band options

A

Single fold

B

Double fold

Tape width options

Standard from 30 to 100 mm.
Further widths on request.

Feeding options

Cradle

A-frame unwinder

Plaited

Modular design concept

Longitudinal section and cross section can be connected in one complete fully automatic line or disconnected and used separately.

Additions and upgrades are possible any time, depending on specific requirements.

Accumulating option

The accumulating unit gives the possibility to store up to 50 mt of product between longitudinal and cross section. In this way the production will not be affected by longitudinal hemming machine stops, increasing efficiency and productivity accordingly.

Compensator

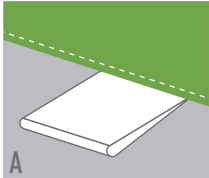

Hem Process option

Different options in the hem process to give total flexibility and versatility in the production.

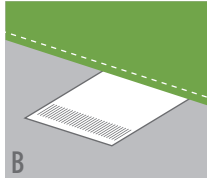

For instance piping, banding, Z-hem, S-hem, attachments, 2-pleats, 3-pleats and much more.

CUSTOMIZE AS PER YOUR REQUIREMENTS

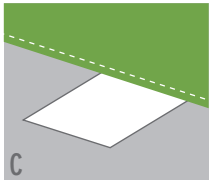

Label options

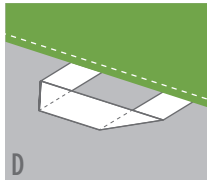

Folded label

Bar coded label

Flat label

Delta shaped label

Sewing options

- Chainstitch
- 2-needle Chainstitch
- Lockstitch
- Zig-zag stitch

Longitudinal hem width options

From 10 to 100 mm.
Further widths on request.

Cross hem width options

Standard from 10 to 40 mm.
Further widths on request.

Range of home textiles

BED LINEN

Flat Sheets
Bed covers
Bedspreads
Blankets

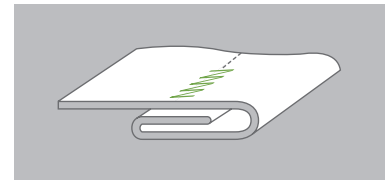

CURTAINS

MUCH MORE

Bartacking options

The PATENTED Magetron Bartacking on-line system for making secure stitch in the corners of the final product and increasing in this way the quality of the output. The stitch is done by means of two separate lockstitch sewing machines.

Remote assistance

The latest technology capable to ensure the best technical support from off site, on-line monitoring and remote diagnostics.
