KAPPA

LONGITUDINAL
OVEREDGING

KAPPA

LONGITUDINAL OVEREDGING (BANDING)

LONGITUDINAL OVEREDGING (BANDING) INSTALLATION FOR RUGS AND CARPETS.

Alignment, edge trimming, labelling, sewing.

The longitudinal overedging (banding) machine **KAPPA** can successfully complete all lengthwise processing procedures with an incredibly high level of quality.

Since 1975 we have increasingly deepened, through a constant and accurate system of research and development, how to get high quality in the process of the longitudinal overedging (banding) without compromising productivity. **KAPPA**, the latest generation of longitudinal overedging machine, is uniquely qualified for industrial use and multi-shift 24/7 operation.

State of the art in achieving the greatest goal: customer's satisfaction.

EFFICIENCY

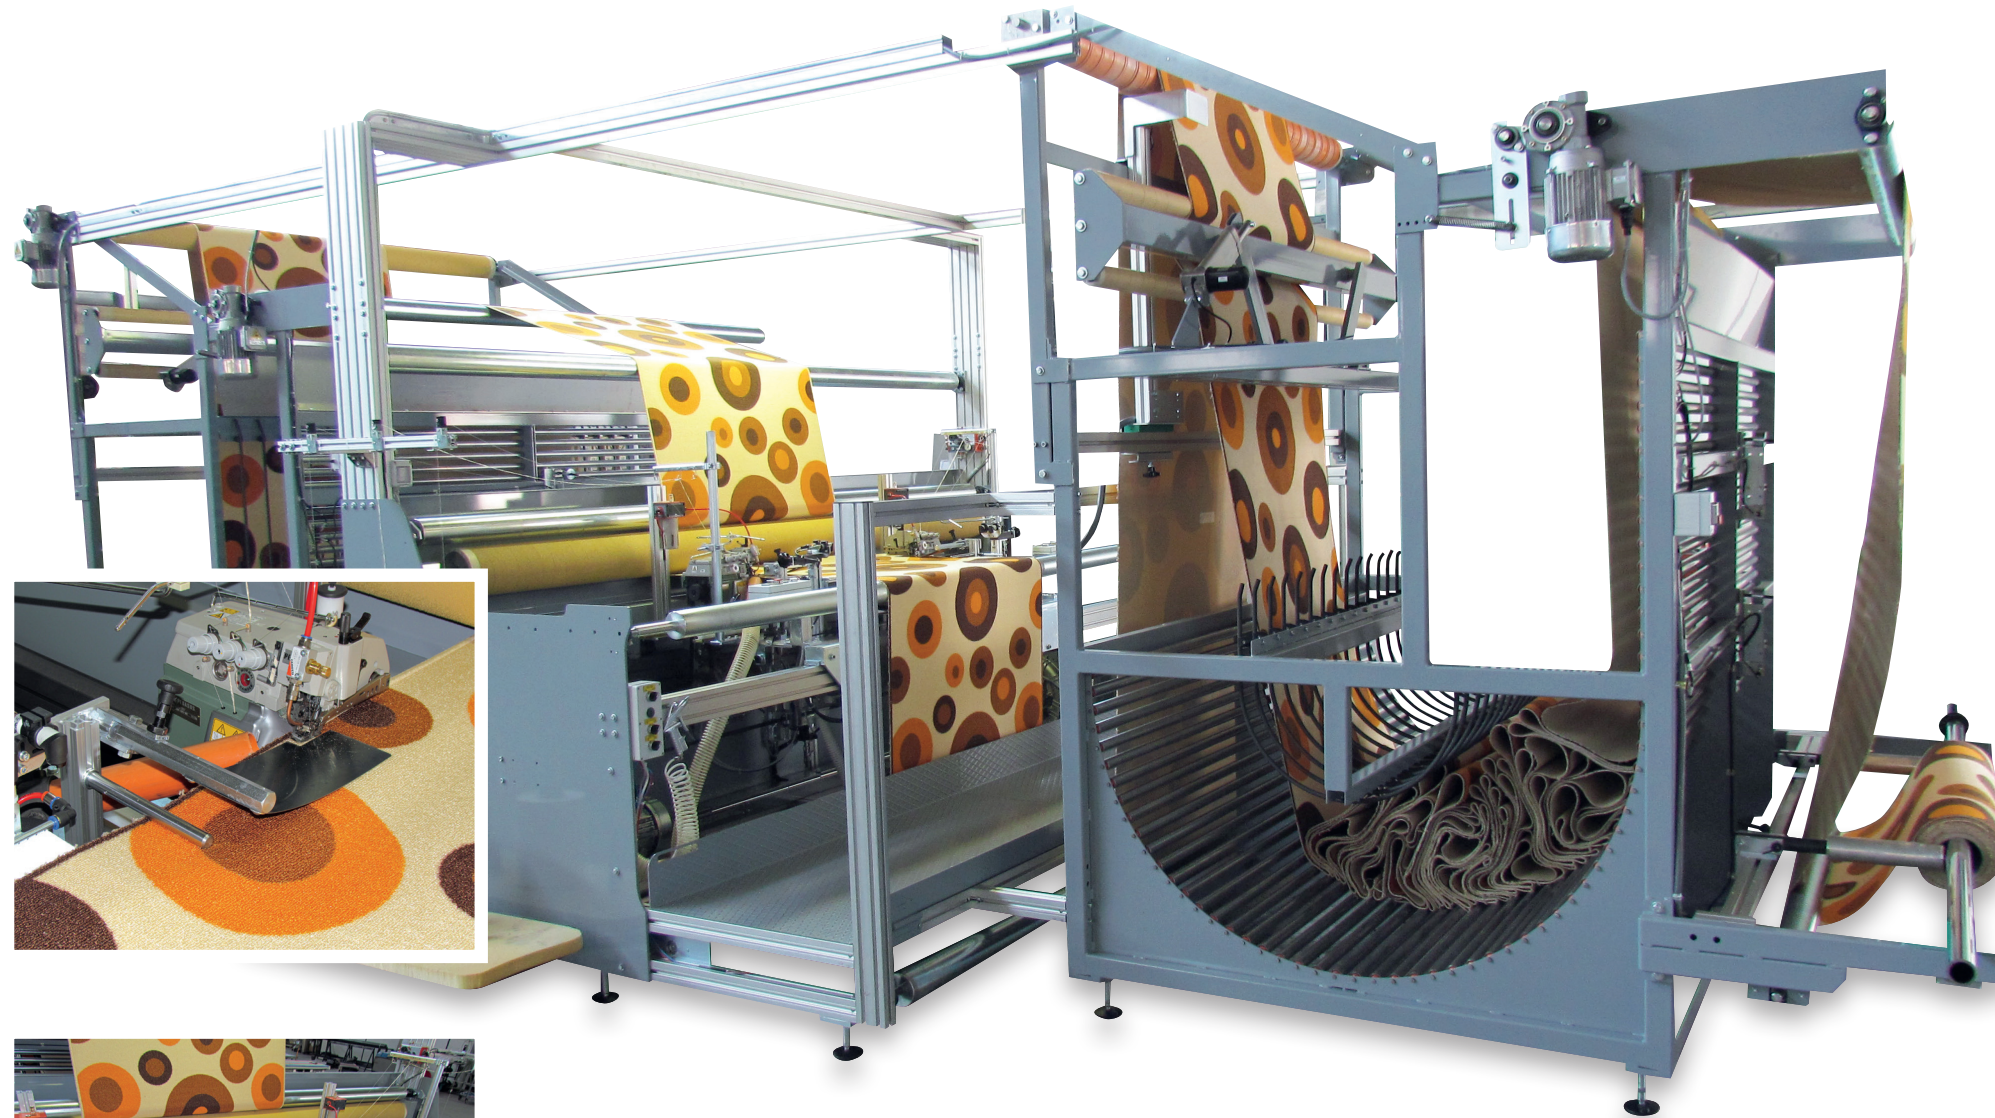

Extraordinary efficiency and manual operations reduced to a minimum allow having high productivity and an attractive cost-performance ratio. Intelligent control technology and strong system components are perfectly coordinated to optimize the production workflow and efficiency.

QUALITY

Magetron **KAPPA** excels in delivering both exceptional productivity and unsurpassed quality. This is the result of a perfect symbiosis between intelligent control technology and precision mechanics engineering. Technology and innovation are the basis to reach the finest quality in the output.

RELIABILITY

Innovative technology and superior manufacturing grant a result in reliability and low maintenance cost. Industrial engineering, quality of construction and made in Italy are all combined in **KAPPA**.

Overedging options

- 2 threads
- 3 threads

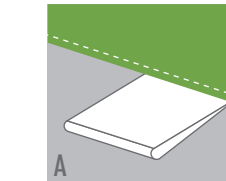

Tape width options

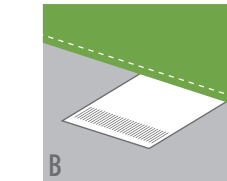

Standard from 30 to 100 mm.
Further widths on request.
