ZETA

LENGTH
SLITTING

ZETA

LENGTH SLITTING

LENGTH SLITTING INSTALLATION FOR RUGS AND CARPETS.

Centring of the fabric, detection devices and sensors to control the cut, cutting section, plaiting.
The longitudinal cutting machine **ZETA** can successfully complete all lengthwise cutting processing procedures with an incredibly high level of quality and productivity.

Since 1975 we have increasingly deepened, through a constant and accurate system of research and development, how to get high quality in the process of the length slitting without compromising efficiency, productivity and flexibility.
And so born **ZETA**, the latest generation of length slitting machine, which combines the use of the most advanced technologies with maximum usability.

State of the art in achieving the greatest goal: customer's satisfaction.

SPEED AND EFFICIENCY BY DESIGN

Quick, precise, efficient: the adjustment of blades and product takes place by means of an initialization system which is completely automatic.
The manual adjustments in order to complete the process become superfluous.

CUT QUALITY AND PRECISION

Unprecedented productivity quality and precision in cutting system.
This is the result of a perfect symbiosis between intelligent control technology and precision engineering.
This allows optimizing the workflow and grants a continuous cycle working process 24/7.

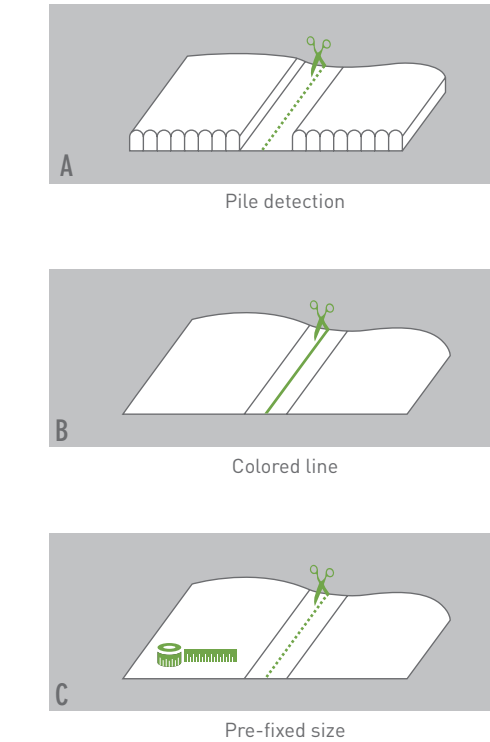

RELIABILITY

Project development, production and assembling are all made in Italy inside our factory.
This grants an high reliability level which is supported by an efficient after sales service as well as on-line assistance.

CUSTOMIZE AS PER YOUR REQUIREMENTS

Detection options

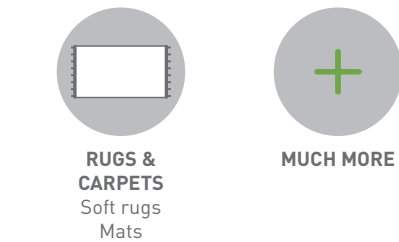

Cutting options

- Circular blade
- Blade and counter-blade

Cutting heads

Number of cutting heads depending on customer's.

Range of home textiles

Remote assistance

The latest technology capable to ensure the best technical support from off site, on-line monitoring and remote diagnostics.
